Health & Safety Plan for UWW Events

Guidance for Event Organizers and Participants

These guidelines are intended to assist Organizers implementing measures to reduce the possibility of viral transmission to a minimum during UWW Events. They complement the sanitary requirements **prescribed by public authorities**. They do not replace all other requirements as provided by the UWW Medical Regulations.

Wrestling being a contact sport, it is at **higher risk** of viral transmission during viral epidemic and pandemic periods. Hence a **higher degree of attention** and more stringent measures are required from the Wrestling community.

Individual **responsibility** is also key to protect the health of everyone. In that respect, detection of infected people and virus careers with no symptoms help reducing those risks. In case of any doubt by an athlete or a participant for a potential viral infection, it is his/her individual responsibility to consider self-quarantine, refrain from participating in sports activities (training, competition) and refer to a hospital or an officially designated centre by the authorities.

This document is is subject to changes depending on the evolution of the pandemic and the progress made by the scientific community with regards to diagnostic approaches, antiviral treatments and vaccine.

In addition to public authorities' requirement and to these guidelines, Organizers must refer to the recommendations of the World Health Organization

https://www.who.int/emergencies/diseases/novel-coronavirus-2019

1. World Health Organization (WHO) tools

It is WHO's view that all countries with community transmission should seriously consider postponing or reducing mass gatherings that bring people together and have the potential to amplify disease and support the recommended best practice of physical distancing. Any decision will be supported through the use of WHO tools, in particular the **Risk Assessment for Mass Gatherings during COVID-19**.

If **movement restrictions** and further national measures have been established in the country, the WHO risk **assessment does not apply**.

However, when the process of re-opening/conducting mass gatherings is being considered post movement restrictions, it will be key to ensure any decisions are based on a risk assessment, such as the WHO Mass gatherings COVID-19 risk assessment.

The detailed **links** to the various WHO tools are noted below.

- How to use WHO risk assessment and mitigation checklist for Mass Gatherings in the context of COVID-19

- Mass Gathering risk assessment COVID-19: key considerations (Excel sheet)

- Decision tree for risk assessment for mass gathering

- Considerations for sports federations/sports event organizers when planning mass gatherings in the context of COVID-19: interim guidance
